Breast Health Program

*Bringing you Comprehensive
and Compassionate Care*

Comprehensive and Compassionate Care

Rutherford Hospital's Breast Health Program is designed to provide each patient with comprehensive and compassionate care. Beyond having state of the art technology for the diagnosis and treatment of breast cancer, each patient is viewed as an individual. A patient navigator, a specially trained registered nurse who offers educational and emotional support from the time of diagnosis until recovery, is available to assist patients and their families.

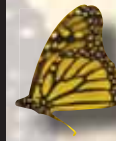

A multidisciplinary case review, involving medical and radiation oncologists, radiologists, pathologist, surgeons, plastic surgeon and the patient navigator is conducted for each patient.

Convenient support services including a cancer resource center, support group, and peer counseling are available to patients through programs offered by Rutherford Hospital.

As the treatment for breast cancer becomes increasingly complex, it is important to know that Rutherford Hospital is here to provide you with knowledgeable and caring medical professionals who will be with you every step of the way.

COMPREHENSIVE BREAST HEALTHCARE

The most advanced imaging technology including Digital Mammography with computer aided detection system and PET imaging.

Patient Navigator who is an experienced nurse, provides information, support and guidance when you need it most.

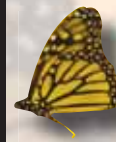

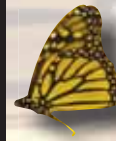

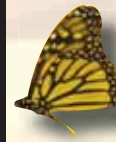

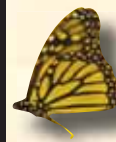

Image directed biopsy including needle and stereotactic biopsy. Sentinel Lymph Node Biopsy Procedures.

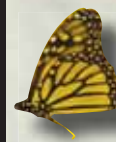

Multidisciplinary approach to determine the care that is right for you.

Certified Cancer Program with commendations from the Commission on Cancer.

Latest breast cancer treatments including clinical trials and genetic counseling and testing referrals.

Oncotype DX: multi-gene tumor analysis determines the treatment that is specific to your diagnosis.

Local comprehensive radiation facility utilizing state of the art IMRT and IGRT equipment.

Emotional Support through groups and programs that connect you with other cancer survivors.

Cancer Resource Center provides educational materials, computer access, wigs and more.
